

Vipul Katarnaware

Mumbai, India — +91-9987599124 — vbkatarnaware@gmail.com — linkedin.com/in/vipul-katarnaware
Product Management — AI Products — B2B SaaS — Consumer Products — FinTech

Summary

Product Manager with 4+ years of experience across Consumer Products, B2B SaaS, AI, and FinTech in startup and enterprise environments. Proven ability to own end-to-end product development, write PRDs, drive roadmap planning, and lead cross-functional delivery with Engineering, Design, Risk, and Analytics teams. Shipped products serving **10,000+ users** across loyalty, lending, and AI-powered automation while delivering measurable business outcomes through customer-centric product decisions.

Experience

QRapid Mar 2024 – Present

Founder and Product Lead — B2B SaaS Loyalty Platform, VJTI TBI Incubated — Mumbai, India

- Owned the full product lifecycle (discovery, PRDs, roadmap, MVP launch, and GTM) for a cross-restaurant loyalty platform with **55 restaurant partners** and **10,000+ diner accounts**; launched **QCash**, a shared loyalty currency that drove a **12.5% repeat visit rate**.
- Conducted structured customer interviews across onboarding, engagement, and retention stages; prioritized iterations using feedback and KPIs, cutting partner activation time by **30%** and increasing repeat transactions.
- Deployed automation for lead management, partner onboarding, and diner engagement using **n8n**, **Zapier**, **OpenAI API**, and **Claude API**; built **TheROI.in** as a content-led demand generation engine for the Mumbai food and beverage sector.

ICICI Bank Jul 2023 – Aug 2024

Product Manager — Policy Manager, Retail Assets and Lending Systems — Mumbai, India

- Managed the Business Rules Engine (BRE) covering credit eligibility, underwriting, pricing, and fraud controls for **millions of loan and credit card applications** per year; coordinated releases with Risk, Engineering, and Analytics teams.
- Designed and shipped **GeoIQ**, a geospatial data layer using address-level signals to target pre-approved loan campaigns, raising campaign approval quality by **15%** with no increase in default rate.
- Wrote business requirements documents (BRDs), mapped lending approval workflows end-to-end, and led UAT sign-off cycles before every production release across all retail asset products.

Kaagjaat Mar 2021 – Jul 2024

Co-Founder and Operations Head — Maharashtra, India

- Built structured client intake, service delivery, and support processes for a legal documentation startup that grew to **50+ paying clients** across Maharashtra with zero external funding.
- Captured ongoing client feedback, identified service gaps, and restructured fulfillment steps to cut average turnaround time by **25%** and improve client satisfaction scores.
- Managed all business functions - client acquisition, scope gathering, and project coordination - as a sole operator, sustaining **consistent monthly revenue** with zero additional headcount.

The Yarn Bazaar Jun 2022 – Aug 2022

Market Research Intern — Mumbai, India

- Built a buyer-supplier database through primary interviews and web scraping, saving **2 weeks** of manual effort and enabling market sizing, competitive benchmarking, and business development outreach.
- Automated data collection pipelines, improving accuracy and team throughput by an estimated **40%**; findings directly shaped pipeline prioritization and outreach targeting.
- Mapped the competitive landscape to help the business development team identify high-value buyer-supplier pairs and sharpen market positioning.

Selected Product Initiatives

QCash- Cross-Merchant Loyalty Currency — QRapid: Spearheaded product discovery and reward mechanics design for a shared loyalty system enabling diners to earn and redeem points across partner restaurants; defined success metrics that confirmed a measurable retention uplift.

Rizent AI- AI-Powered Investor Outreach — rizent.me: Shipped an MVP for an AI-driven tool covering investor sourcing, personalized outreach, and CRM tracking using n8n and OpenAI APIs; tested with early-stage founders and iterated on user feedback.
